TRAILERING CAPABILITY

(ALL SET)

(NO SWEAT)

(ALL 30 FT OF IT)

Everything about Yukon is designed and engineered for confident trailering so you don't have to leave your boat, your camper and, especially, your passions at home. Choose Yukon Denali with the 6.2L V8 and the 10-speed automatic transmission and pull up to 8,400 lbs¹. Yukon SLE and SLT models offer a maximum trailer rating of up to 8,500 lbs¹ with the 5.3L V8 and the available Heavy-Duty Trailering Package. Some of the technologies that make this all possible:

TOW/HAUL MODE This feature raises transmission upshift points to help accelerate and improve drivability when trailering or hauling heavy loads.

TRAILER SWAY CONTROL Helps keep your Yukon and your trailer heading in the same direction, automatically. The system uses StabiliTrak sensors to detect a swaying trailer, applying both Yukon's and the trailer's brakes (if properly equipped) to help bring it back in line.

INTEGRATED TRAILER BRAKE CONTROLLER For fingertip control of your trailer brakes, an integrated trailer brake controller is available. Conveniently located to the left of the steering wheel, it displays the level of brake force, or "gain," in the Driver Information Center.

Yukon color shown has limited availability.

¹8,400 lbs requires Yukon Short Wheelbase 2WD model with 6.2L V8. 8,500 lbs requires Yukon Short Wheelbase 2WD model with 5.3L V8 and available Heavy-Duty Trailering Package. Before you buy a vehicle or use it for trailering, carefully review the trailering section of the Owner's Manual. The weight of passengers, cargo and options or accessories may reduce the amount you can tow.
