Command the road with a hand-built 6.2L supercharged V8 engine and 682 horsepower at your fingertips. A monstrous 885 NM of torque helps to get your pulse racing and accelerate from 0-100KM/H in under 4.6 seconds.

Due to global Semi-Conductor supply shortages, Cadillac vehicles may not have some standard features and options. Please check with your local Cadillac dealer to confirm the vehicle's specifications prior to purchase. Vehicles not equipped with Automatic Stop/Start will be less fuel efficient.

STYLING

Indulge in superior luxury, and witness suave sophistication and precise panache make a powerful statement.

BREMBO BRAKES

REAR PEDESTRIAN ALERT

Rear Pedestrian Alert^{*} can help alert you to detected pedestrians directly behind the vehicle. The system works when you're in Reverse during the daytime. It has limited nighttime and low-visibility performance.

FRONT PEDESTRIAN BRAKING

Front Pedestrian Braking^{*} can alert you via haptic seat feedback when it detects a pedestrian directly ahead of you. It can even automatically provide hard emergency braking or enhance the driver's hard braking to help reduce collision severity or even avoid detected imminent pedestrian collisions. The system works at speeds below 50 mph during the daytime. It has limited nighttime and low-visibility performance.

LANE CHANGE ALERT WITH SIDE BLIND ZONE ALERT

Lane Change Alert with Side Blind Zone Alert^{*} can provide side-mirror visual alerts when a detected moving vehicle is quickly approaching or is in your side blind zone. It can help you avoid lane-change collisions.
